Authorized Distributor Newsletter

## Welcome New Distributor – Basin Engine & Pump

Flowserve is pleased to welcome Basin Engine & Pump as the latest addition to our family of Authorized Distributors. The company is owned and operated by FCX Performance, a wholly owned subsidiary of Applied Industrial Technologies. The new partnership between FCX and Flowserve adds synergy to the product coverage already in place with Flowserve's existing distributor Pump Energy, Inc. also an FCX Performance company. Joining with our long-established distributor Pump Energy, the addition of Basin Engine & Pump now enhances Flowserve's partnership with FCX, allowing both FCX and Flowserve Pumps and Seals to provide the West Texas market with a cohesive platform for success throughout the Permian Basin.

an FCX Performance Company

Basin Engine and Pump got its start 30 years ago rebuilding and repairing engines. But it made a name for itself by partnering with their customers to specify, install, service and maintain fluid handling components and systems. Basin Engine & Pump offers service 24/7 and consistently has 10 trucks off-site, managing installations, service and repairs. The company employs 21 people at their branch location in Midland, Texas. The facility includes multiple buildings on a campus of approximately 6 acres
